Kaleidovision

KL4 DJV
MUSIC VIDEO PLAYER

Introducing Kaleidovision's revolutionary new KL4 DJV, designed for creative and forward-thinking DJs working in today's demanding bar and club industry.

Our new professional player gives you the best of both worlds in one system. Its professional DJ mode provides seamless beat matching and access to all the latest music videos, and it acts as a daytime background music system for venue operators.

Motion graphics can also be scheduled to play in-between music videos to enhance the atmosphere and make any audience stop, look and listen.

FEATURES FOR DJS

INTUITIVE SOFTWARE

Show off your skills. Whether you're an amateur or super-pro, KL4 DJ helps you to produce a great show while giving you more time to interact with your audience.

BEATS & VIBES

AUTO BEAT AND TEMPO RECOGNITION

Produce a killer mix. KL4 DJV allows you to keep the vibes flowing through its state-of-the-art beat recognition, which opens the door to features such as auto-sync and pitch-bend.

VISUAL WAVE SCALE

Get set for bang on transitions. Our slick audio waveform display shows you the track's structure and play-back position control so you can cue to specific points.

OFF THE HOOK MIXING

LOOPING AND CUEING

Connect with your audience. Looping and cueing styles available on KL4 DJ create excitement in your set and enable you to mix tracks to form a good flow. Also, cue points allow DJs to get tracks in the correct position and manipulate songs depending on the vibe of the night.

AUDIO EFFECTS

Step up your game. Shake things up and throw down extra sounds by dropping in effects. KL4 DJ includes professional audio effects such as Flanger, Phaser, Tremalo, Beatwall and more...

SYSTEM SET-UP

SYNC-UP

Get hooked up. KL4 DJ's versatile software platform allows you to stay in control and sync-up to whatever types of controller you use in-venue.

CD DECKS > KL4

Connect into the KL4's sound card direct from your CD decks using a standard phono cable. This enables you to control features such as play, pause and cue from the CD player using the timecode CDs provided.

TURNTABLES > KL4

Connect into the KL4 from your turntable via a sound card We supply timecode vinyl records so you can control speed, direction and position of tracks, providing a real hands-on interface.

MIDI CONTROLLER > KL4

Connect into the KL4 from your MIDI controller. The KL4's on-board MIDI learning functions enable you to connect the buttons on the hardware controller to the software features on screen.

Kaleidovision

FEATURES FOR VENUE OPERATORS

GREAT MUSIC WITHOUT A DJ

We've got it covered. KL4 DJ's semi auto mode runs on-brand default profiles when DJs aren't present, so you don't have to worry about a thing, but if you want to change the mood we can fix you up with the right tools.

BANG UP-TO-DATE MUSIC LIBRARY

MUSIC AT YOUR FINGERTIPS

Never miss a beat. We keep you up-to-date with all the tunes your customers are hungry to hear, and make sure all the hottest music videos are ready on your player.

PERFECT SOUNDTRACK FOR YOUR BRAND

SAVVY PLAYLIST DESIGN

We're on the ball. Our music crew live and breathe music and create playlists with seamless DJ-style transitions. We are experts at designing playlists, and work with bars and clubs to ensure the music played in the daytime or on non-DJ nights is spot on for your brand or environment.

SEMI-AUTO VERSION

IT'S GOOD TO TEXT

FUN WITH SMS

Create more buzz. Text 2 Screen is a cool and fun way for DJs to interact with your audience, and make screens work harder for you. It can be a powerful tool for DJs to help boost the night's entertainment, but also provide an additional revenue stream and collect valuable data for future marketing promotions.
